

PRESS RELEASE

Vicon Feedex Loader Wagons

19.10.2010, Gottmadingen, Germany

Feedex 390

By adding many new features Vicon has started the generation change going from the - K series to the new Feedex series on its loader wagon range. All seven models from Feedex 300 to Feedex 500 have been given a new design. Included in these changes is the new 5 feeder comb loading unit, which is available from Feedex 360 T onward. The new loading unit combines the advantages of stronger design and form fitting mounting into the frame.

Feedex Loader Wagons – New Feature 5 Feeder Comb

The new Feedex loader wagons are still equipped with the wearless arm controlled loading units. In addition to this feature Vicon has introduced the new 5 feeder comb loading unit, which offers the following advantages:

- Each of the feeder combs consists of a through-going tube ensuring maximum strength and precision.
- The 5 feeder comb loading unit is form fitting linked to the frame. This way any stress on the loading unit will be absorbed by the strong frame and not only via the bolts. This ensures sustainability especially in heavy conditions.

Feedex 422 – New Cross Conveyor Belt.

An extra benefit is based on the optional left/right cross conveyor, for daily feeds to include fresh-cut forage, easily installed via connectors and couplers. When harvesting silage, the operator will remove the unit within a few minutes, to ensure full use of the 12-ton capacity. The cross conveyor belt is a retrofittable option on all Feedex 422 models.

Technical Specifications:

	Feedex 300	Feedex 360 S	Feedex 360 T	Feedex 390	Feedex 422	Feedex 440	Feedex 500
