

PRESS RELEASE

Vicon is introducing a new pendulum spreader

23.08.2010, Nieuw-Vennep, The Netherlands

Vicon is introducing a new pendulum spreader. The PS225 pendulum spreader is replacing the PS203. The basic hopper capacity is increased up to 220 litres. The standard working width is 1-14 metres.

The PS225 has a wear resistant poly ethylene (PE) hopper instead of a polyester hopper. Because of this wear-resistant hopper you don't need a stainless steel insert for sand and salt spreading anymore! The basic hopper volume can be increased with a 110 litre hopper extension up to 330 litres, the PS335.

A truly multi-functional spreader

The PS225-335 is a truly multi-functional spreader. This smallest model of the unique Vicon pendulum spreader range is ideal for use on golf courses, sport fields and grounds, as well as in many horticulture and municipal applications.

A variety of spouts for different applications and spreading widths makes it possible to spread fertiliser, seeds, sand, salt, pellets or any other granular product.

Accessing spreading charts

Spreading charts for the Vicon PS spreaders can be accessed on the internet (www.viconspreadingcharts.com), also by web enabled mobile devices (<http://viconmob.com>).

Vicon SuperFlow PS225-335 – Technical specifications:

Model	PS225	PS335
Hopper capacity (l)	220	330
Hopper Width (cm)	106	106
Filling height (cm)	77	99
Empty weight (kg)	83	85
Spread width (m)	1-14	1-14
PTO speed (rpm)	540	540
3-point linkage	1	1

Kverneland Group (Kverneland ASA - OSE: KVE) is a leading international company developing, producing and distributing agricultural machinery and services. Strong focus on innovation allows us to provide a unique and broad product range with high quality. Kverneland Group offers an extensive package of systems and solutions to the professional farming community. The offering covers soil preparation, seeding, forage- and bale equipment, spreading and spraying. For more information on Kverneland Group visit www.kvernelandgroup.com
