

PRESS RELEASE

Starguide III – The Next Step in Sprayer Section Control

01.02.2011, Nieuw-Vennep, The Netherlands

Starguide III automatic GPS section control

One of Kverneland Rau latest developments is the Starguide III. This is a GPS-equipped boom section control system which includes headland management to avoid overlap or unsprayed areas. After spraying the field boundary the overlap and headland management are controlled for the rest of the field!

The Starguide III enables you:

- Spraying in the dark
- Accurate spraying by full overlap control
- Increased capacity by higher average speed
- Increase operator comfort

In addition, Starguide III also includes the following features:

- Easy to operate, intuitive 5.7" colour touch screen
- Integral light bar guidance system
- Field view with covered areas and overlap
- Single and double overlap in different colours
- GPS status warnings
- USB slot for data export in different formats

The Starguide III is equipped with the standard Kverneland Rau connectors, so easy to connect directly into the control box. No extra cables, wires or section switching modules are required, not even for power supply!

Starguide III can be retro-fitted to all our spray controllers, like FlowMate Control, Focus II and IsoMatch Tellus virtual terminal.

For spraying in hilly conditions there is an optional Tilt Gyro module available for the Starguide III. This module will maintain the required accuracy when spraying on slopes.

Kverneland Group (Kverneland ASA - OSE: KVE) is a leading international company developing, producing and distributing agricultural machinery and services. Strong focus on innovation allows us to provide a unique and broad product range with high quality. Kverneland Group offers an extensive package of systems and solutions to the professional farming community. The offering covers soil preparation, seeding, forage- and bale equipment, spreading and spraying. For more information on Kverneland Group visit www.kvernelandgroup.com
