

PRESS RELEASE

mc-drill PRO, the cultivator-mounted mechanical seeder

01/01/11 Soest, Germany

Kverneland Accord, the specialist in seeding technology within the Kverneland Group, have added to their range of mechanical seed drills by launching a cultivator-mounted mechanical seed drill - the *mc-drill PRO*. This mechanical seed drill is available in working widths of 3.0m and 4.0m for both farmers and contractors.

One of the main advantages for the operator is the constant depth control of the coulters, thanks to the direct link between the coulters bar and the roller mounted with a parallelogram linkage system – additional settings due to tine wear on the rotary harrow are not necessary.

A special fitting system to the Kverneland power harrows enables the farmer to disassemble the seed drill for solo operation within short time. In addition various options and equipment possibilities ensure a machine set up for all field conditions.

Kverneland Group (Kverneland ASA - OSE: KVE) is a leading international company developing, producing and distributing agricultural machinery and services. Strong focus on innovation allows us to provide a unique and broad product range with high quality. Kverneland Group offers an extensive package of systems and solutions to the professional farming community. The offering covers soil preparation, seeding, forage- and bale equipment, spreading and spraying. For more information on Kverneland Group visit www.kvernelandgroup.com
